

The Optimum OE13

INTELLIGENT MANAGEMENT SYSTEM

The **Optimum OE13** is an intelligent management system for electrified Ecorad radiators. This system combined with the expertise of Ecorad, has the ability to maximize the inertia properties of cast iron radiators to **consume the least amount of energy possible**.

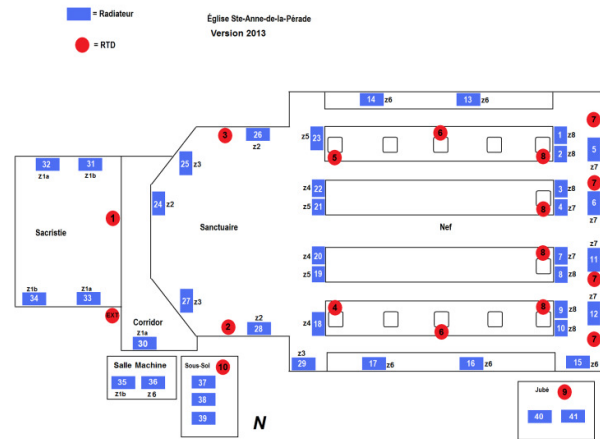

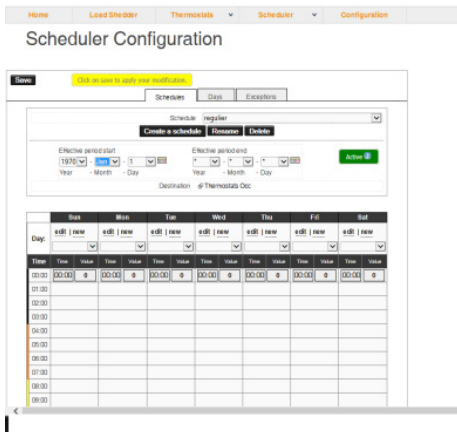

Available for all type of buildings regardless of heating energy installed.

- Flexible zoning plan
- Programmable load shedding
- Limits the power demand
- User friendly

ALL THE BENEFITS OF RADIANT MASS HEATING WITHOUT THE HEADACHE OF A CENTRAL SYSTEM!

- Maintenance costs eliminated
- Contaminant removed
- Reduced risk of fire and water damage
- Electrified autonomous units
- Easy to install

Programmable with user friendly software, along calendar and/or time schedules, the configuration and utilization is via an independent **touch screen**, a computer locally or remotely through the internet.

Advantages:

- Programmation considers outside temperature and usage of each area
- Power setpoint is adjustable
- Alerts are configurable
- Self-governing once programmed
- Stores data for up to four years
- Printable tables or graphs of history

The **internet option** allows users via a password, to verify, change the settings and receive alerts by email.

Free technical support for the first 12 months from the start, with the internet option.

Note:
Startup performed by a Ecorad technician (included)
Full connection must be done by qualified electrician (not included)
2 years limited warranty on parts
Warranty details available in our terms and conditions, available on our website; www.ecorad.ca

Optional extended 3 years warranty available
